

MASS NOTIFICATION SYSTEM CLIENT SOFTWARE

Designed specifically for schools, hospitals, corporate and municipal campuses looking for an efficient way to detect and respond, Code Blue's **Blue Alert® MNS** is part of our First Responder package that fills a need in the marketplace for an incident response solution that is both comprehensive and cost-effective.

The next generation of our award-winning Blue Alert PAS software, **Blue Alert MNS** provides emergency notifications over audio, visual and messaging platforms at the touch of a button. The result is a sophisticated software solution that quickly informs and directs people in emergency situations.

Blue Alert MNS is available in two editions, Audio/Visual and Messaging, that are available individually or together in the **Blue Alert MNS** Professional Package.
