WALL/POLE MOUNT – INTERACTIVE VOICE COMMUNICATION UNIT

The **CB 4-d** offers the same features as the CB 4-s, but is built around a larger platform to accommodate a second opening for additional optional features. The all-steel housing and Code Blue's speakerphone system meets the need for a highly vandal resistant unit while providing a cost effective and reliable solution.

The second opening provides space for factory options including a directory or specific user options such as CCTV, among other security devices. The optional remote mount combination LED beacon/strobe kit allows the user flexibility throughout the job.

The exclusive analog InterAct™ and VoIP speakerphones are designed for maximum reliability, vandal resistance, auxiliary functions, mass notification control, and fault monitoring and reporting capability; leading the market in system programming flexibility.

The **CB 4-d** is a good choice for dorm and building entrances, hallways and transit centers.

STANDARD FEATURES

- ▶ Analog and VoIP speakerphone options
- ▶ ToolVox® Communication Manager compatible with Blue Alert®, EMS and UPD software integration
- ▶ 2 Auxiliary inputs/3 Auxiliary outputs (3 NO or 3 NC)
- ▶ Second opening with blank stainless steel plate
